DETAILED ACTION

Double Patenting

1. Claims 1-8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3 and 11 of copending Application No. 09/904001. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Claims 1 and 5: claim 11 of '001 discloses a transmitter such as that in present claim 1; using the transmitter in a UE or BS would have been an obvious step given that the transmitter is for transmitting user data, and further the compensation portion would not have changed the patentability with regards to the application of claim 11 of '001. Note that claim 3 of '001 corresponds to instant claims 3 and 7 for the same reasons. Claim 5 of '001 corresponds to instant claims 2 and 6, and claim 13 of '001 corresponds to instant claims 4 and 8.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haim 944 discloses a similar system to application 09/904,001.

Nelson, Blessent, Malladi and Jo disclose means to control transmission power and varying transmission rates.
